- 4. Lift Capacity is measured from the bucket hinge pin over the front of the machine with the blade on the ground.
- 5. Lift Capacity is measured in pounds at the height above ground and distance from central pivot point of the machine as listed below and does not include the weight of the bucket. a. U17, U10 = 4' Height/ 6' Distance b. U27, KX040, 71 = 4' Height / 8' Distance c. U55, KX080 = 4' Height/ 12' Distance

6. All machines have rubber tracks, and specifications are for machines with rubber tracks.
